Subject: CDP #2017-0007 (Fallow)

Hello Julia,

This project was discussed at the July 6, 2017 meeting of the Gualala Municipal Advisory Council and approved unanimously with the following conditions.

As the entire site is an ESHA, the recommendations of the Botanical Scoping Survey Report (Section 5.1 Recommended Avoidance, Mitigation and Restoration Measures) should be strictly followed, including the Northern Coastal Bluff Scrub to the north of the planned housing site.

Regards,

Eric Mills
